

WORK PLAN TO IMPROVE HEALTH AND HEALTH CARE IN OHIO

▼ OBRT Executive Committee meetings

HEALTH SYSTEMS MAY BE DIAGNOSED BY PUBLIC HEALTH AND HEALTH CARE DELIVERY ELEMENTS

REFORM INVOLVES DIFFICULT TRADEOFFS AMONG SEVERAL COMPETING OBJECTIVES OF HEALTH SYSTEMS

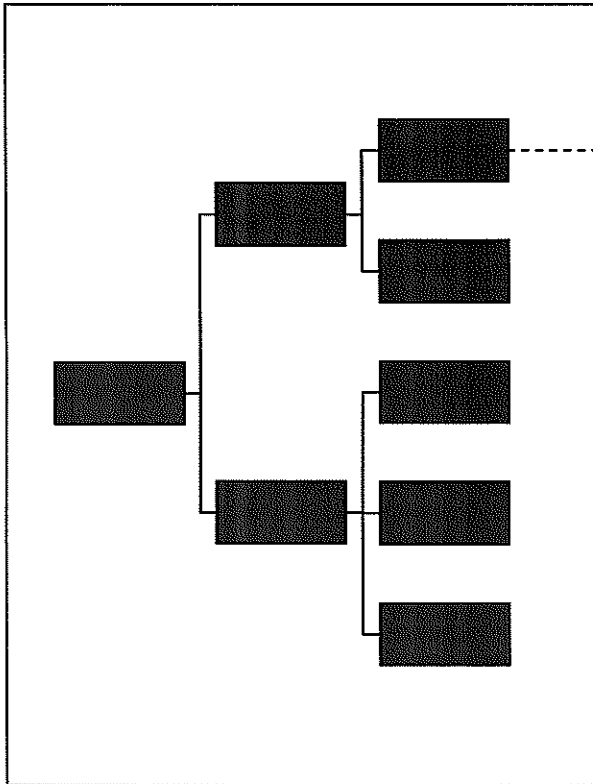

Health
system
objectives

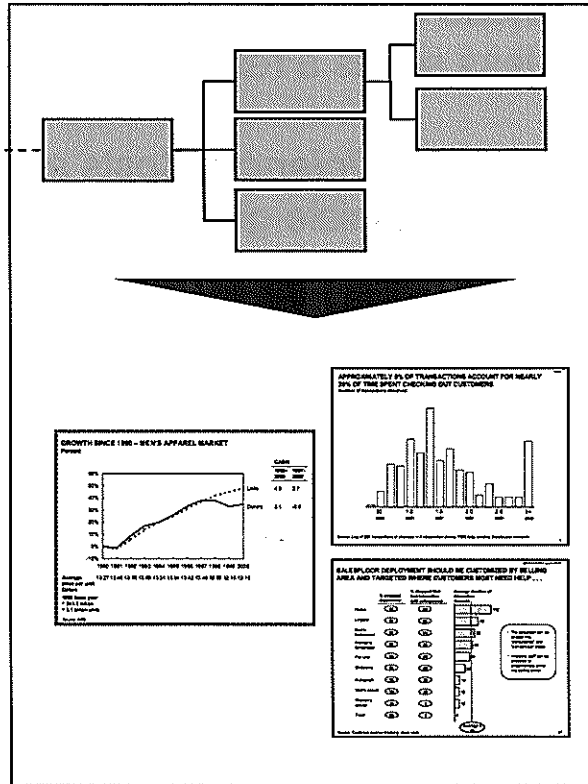

- **Business climate:** Businesses are more competitive, rather than less so, as a result of the health system
- **Economic efficiency:** Costs are economically sustainable and as low as possible given other system objectives
- **Life and health:** Life is extended and quality of life is preserved and improved, including individual productivity
- **Fairness and equity:** Both the costs and benefits of the health system are reasonably shared among consumers and other stakeholders
- **Citizen satisfaction:** Citizens are satisfied with how the health system operates and their share of the costs and benefits

FACT BASE DEVELOPMENT IN PHASE 2 WILL INVOLVE THREE MAJOR STEPS

2A Gather data using the diagnostic tool as the framework

2B Perform more detailed analysis in areas of greatest opportunity for Ohio

2C Prioritize and frame opportunities based on expected impact and feasibility
